Empowering Lives. Restoring Families.™

Comprehensive, Outcomes-Driven Behavioral Healthcare in California

for Children, Teens, and Young Adults

Newport Healthcare's industry-leading programs in California guide young people to achieve long-term recovery from mental health and substance use disorders. Serving children, teens, young adults, and families from around the country, our California locations provide:

- Tailored treatment for specific age groups and conditions
- Psychiatric care and medication management
- Family-focused approach that strengthens parent-child attachment
- Evidence-based clinical and experiential modalities to support healing, resilience, and positive coping skills
- Accredited academic program and life skills training to keep young people on track with their educational and career goals
